Schaffner – Shaping Electrical Power

The Schaffner Group is a global leader in solutions that ensure the efficient and reliable operation of power electronic systems by shaping electrical power. The company's portfolio includes EMI filters, power magnetic components, power quality filters and the related services. Schaffner components are deployed in electronic motor controls, in wind power and photovoltaic systems, rail technology applications, machine tools and robots, electrical infrastructure, and in power supplies for a wide range of electronic devices, such as in medical technology. For the automobile industry, Schaffner develops and manufactures components for convenience and safety features in cars, and filter solutions for electric vehicles and their charging infrastructure. Headquartered in Switzerland, Schaffner serves its global customers through its engineering and manufacturing centers in Europe, Asia and North America. High investment in research and development helps drive the expansion of the Schaffner Group's leading position in its markets.
